

Code Installation

Gift card code installation

For those of you who have elected to apply the gift card code to your website, you will have received the code snippet directly from Web.com via email. You will need to take that code and apply it to your website in order to sell your gift cards online.

The HTML code snippet for Gift Cards may be installed onto your existing website, or any area that will allow the input of HTML code. Installation of this code may be done in multiple places, allowing you to promote your gift cards on your website.

The snippet is unique for your gift card store, and is shown in the following example:

```
<div><a href="http://www.mcssl.com/store/STOREID/gift-card"></a></div>
```

Installing the code snippet

Locate the area in the HTML code you wish to install the snippet. Copy the code snippet and paste into the area where you wish to install it.

```
<body>
```

```
.
```

```
.
```

```
.
```

```
type= "image" value= "Submit" /></form></div>
```

```
<div class="newsprivacy"><a href="http:// [1sc:website / ] /privacy-policy">We respect your privacy</a></div>
```

```
{ <div><a href="http://www.mcssl.com/store/115234/gift-card"></a>
</div> }
```

```
</div>
```

```
<div id="footer">
```

```
<div id="footerlinks">[1sc:footerlinks / ] </div>
```

```
<div id="ftlinks-bottom"></div>
```

```
<div class="credits">[1sc:footer / ]</div>
```

```
</div>
```

```
<div class="spacer"></div>
```

```
</div>
```

```
</body>
```

The above example was placed into the right navigation area of an existing website as shown below:
